SECTION A

INTRODUCTION TO OPENTYPE®

WHAT IS OPENTYPE?

OpenType® is a cross-platform font file format developed jointly by Adobe and Microsoft. The two main benefits of the OpenType format are its cross-platform compatibility (the same font file works on Macintosh and Windows computers), and its ability to support widely expanded character sets and layout features, which provide rich linguistic support and advanced typographic control.

OpenType fonts can be installed and used alongside PostScript® Type 1 and TrueType fonts.

The range of supported layout features may differ in the various FontFont OpenType packages, therefore each OpenType package will be accompanied by this FF Info Guide listing the layout features supported by this specific font package.

You'll find a glossary of all available OpenType layout features in Section B of the general FF OpenType User Guide.

Please see the FontFont OpenType® User Guide
at <http://www.fontfont.com/opentype>

ABOUT FF GOOD LIGHT

At the beginning, the task was to design a cold, informal family for a news weekly: very straight and legible, but still unique if that's possible at all. After a few months of work on this project, our team got another, even more important redesign project, the computer magazine Komputer Swiat. The typeface was almost ready, 49 styles were there, why not try it here? Lots of columns combined with the Polish language ... and it worked! Later on, another project was the Russian version of OK magazine with a lot of pictures and short stories about celebrities. I was asked to design a Cyrillic typeface for this magazine, I tried and it worked as well. The news weekly is still waiting for its redesign, but after another period of hard work, Italics and a Headline version complete the family now.

ABOUT LUKASZ DZIEDZIC

Lukasz Dziedzic was born 1967 in Warsaw. Rather than to finish high school, he worked as a sound technician, actor, carpenter helper rebuilding 13th-century churches, singer/bass guitarist and software developer at the Polish patent office. During the first free Polish elections of 1989, he briefly worked as a newsboy for Gazeta Wyborcza, the newly-launched, first independent daily newspaper in the country. A year later, he joined the design department of Gazeta Wyborcza and spent seven years there, co-creating the layouts of the main newspaper and its weekly companion magazine, for which he drew his first typeface. He later worked for several other publishing houses in Warsaw, designing newspapers and magazines. At the same time, Lukasz drew over a dozen typeface families ranging from large Latin and Cyrillic text families to single display styles.
